### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12-24-2009 has been entered.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 6 and 16, the multi-color rotary printing machine and process as claimed including particularly at least one information carrier that includes a sequence of magnetizable individual elements from which information is removed using the sensor, the information that is read out being automatically suitable for determining relative peripheral and axial positions of the printing plate support on the mandrel or on the print cylinder of the rotary printing machine, and the information carrier being arranged outside the mandrel and between the print image and an edge of the printing plate support that is turned toward a front end of the mandrel or of the print cylinder, are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
